Synthetic observation

Synthetic microscopy shows position-dependent defect density.

The spatial trend is not explained by the current process model.

SYNTHETIC OBSERVATION

Synthetic results

Result / Discussion

The gradient supports the transport hypothesis, but does not discriminate boundary effects.

Decision: Trend supports the mechanism but a control is missing.

Next Step: Run synthetic position comparison; status planned; due 2026-09-02T09:00:00Z
